

VYNCO LIGHTING

LED DOWNLIGHTS

GOOD LOOKS, GREAT PERFORMANCE

Replace your old downlights
and save over 80% of the energy cost.

With electricity prices rising fast and expected to go even higher, reducing energy usage is essential for every home and business.

One easy way to slash energy costs is to swap out those power-hungry downlights for revolutionary new Vynco LED downlights - the alternative that looks and performs like a traditional downlight and gives the best energy saving possible, more than 80%.

They also generate significantly less heat and so reduce cooling costs in summer and remove the fear of downlight-related roof fires.

Complete with a plug-in power supply, in many cases these downlights take only minutes to install.

And we're so confident of our product that we give you a 7 year guarantee.

Vynco LED downlights are also the perfect choice if you're building or renovating.

At home or at the office, zero maintenance and energy saving is now a priority.

By reducing maintenance costs, Vynco LED downlights provide even greater savings in commercial and hospitality environments.

LONG LASTING

In the home, a failed downlight can be a nuisance. In business, failed lights can mean loss of revenue and increased safety risks.

Typically, Vynco LED downlights will last more than 16 times longer than a standard downlight lamp. That's a huge maintenance saving for any home or business owner.

HOW MUCH CAN YOU SAVE?

Calculating your potential savings is easy. Email lighting@vynco.co.nz or contact our customer services team on (09)525 6051 or (03) 379 9283.

HOW TO START SAVING

Your local professional electrician can give you a quotation for the supply and installation of Vynco LED downlights. Or call us for a referral to a company in your area.

Long-lasting - up to 14 years in a typical domestic situation

Low profile, 10W, 60° beam angle, 15° tilt fittings with high output performance of up to 770 Lumens

Patented low glare lens provides a smooth and even dispersal of light

Easily replaces most existing downlights

Available in 3 light colours: Warm / Natural / Cool White and 2 fixture colours: White / Satin Silver

Optimal thermal design prevents fixtures from operating at high temperatures

Supplied with patented dimmable driver

60° Beam Angle	Warm White (3000K)	Natural White (4000K)	Cool White (5000K)
Lumen Output (Luminaire)	730Lm	746Lm	770Lm
Colour Rendering (CRI)	> 80%		
Luminous Efficiency	70Lm/W	70Lm/W	74Lm/W
Power Consumption (LCP)	220-275Vac Total Load 10.4W (including driver)		
Total Harmonic Distortion	< 15%		
Tilt Angle	+/- 15°		

Cutout Sizes: Compact 65-75mm; Universal 65-95mm
